To

The Dept Comr of Mysore

Sir,

I am requested to forward herewith for your information copies of the marginally noted papers regarding the proposed Extension of the Kalkatti Channel from the left bank of the Hemavati River.

2. You will see from these papers that ~~the~~ the channel in question was formerly under the management of Govt, that ~~the~~ the objection of the Perkala-Swami Mutt was finally over ruled by the late Chief Comm.r and that after the rendition the Govt acceded to the request of the Mutt, and transf.d the management of the Channel, but under certain express Conditions as to

1. Note by D.P.W. Secy. d/ 20. 9. 88.
2. Dewan's order thereon d/ 26. 9. 88
3. D.P.W. Secy's letter No. 719 d/ 22 Feby 1884 to Ex. Engr Hassan
4. Para 3 of Mysore Ex. Engr's letter No. ~~405~~ d/ 368 d/ 17 Augt 1888.
5. Paras 7, 8, 13 & 14 of Asst Engr Mr Tivari's letter No. 283 d/ 14 May 1888.

An extension of the Channel by Govt, was finally

maintenance, and ~~the~~ ~~Mutt's liability~~ as to what the Mutt should do in case the Govt decide upon an extension of the Channel —

3. Upon the ~~last~~ repeated entreaties of the Ryots concerned the Govt have now ~~come to the decision~~ decided to extend the channel up to the 16th mile, and owing to this decision it is now necessary to revise the arrangements recorded in DPW Secy's letter to the Govt Engr Harrow No 719 dt 22nd Feby 1884

4. Under such circs I am to request you will interview the Guru and explain to him the present aspect of the Case — The Govt have been quite willing to ~~let~~ allow the Mutt to manage the first 7½ miles of the channel, which is exclusively used for the Mam ~~Mutt~~ Villages of the Mutt, ~~the Mutt~~ so long as no interests outside ~~Mam~~ those Villages were involved ~~Villages were interested~~, but Govt in the case of ~~Mutt~~ this portion of the Channel ~~Villages~~ they have had to

insist upon a proper Standard
of ~~efficiency~~ efficient
maintenance, for the
protection of the main tenants
& occupants — But the
proposed extension would quite
alter this Condition of things,
for Where the channel now
Commands only about 400
Acres nearly all Mutt
land, its extension would
Command nearly 1200 Acres
of Govt. land in addition. This altered
State of things justified a reversion
to the former System of the Govt
Keeping the maintenance in its
own hands, receiving from the
Mutt a fixed amount towards
this object & relieving it altogether
of all liability for paying
for Special repairs to the
Channel or its works. ~~From~~
~~to [illegible] the Govt~~
~~[illegible]~~ The Govt
hope that this arrangement
will Commend itself to the
Mutt, as it is one of
obvious advantage to it as
well as to its tenants.
You are accordingly requested
to ascertain from the Mutt

~~to pay~~

What ~~amount~~ amount it is
proposed to pay towards
annual maintenance,
~~either~~ at a fixed rate
either per mile of channel in [illegible]
or per ~~acre~~ Rupee
of assessment of the land
wet land under the
channel —

5. I am also to request you
to ~~ask~~ require the
Municipality to issue immediate
orders to its agents to
give such land as may
be required for the
widening of that ~~part of~~
portion of the channel
which is situated within
the Municipal limits.

6. Your early attention
is requested to the necessity
of at once obtaining
Muchilkas from Ryots
whose lands would be
converted from dry into
wet by the proposed
extension, promising to
pay due ~~rent~~ assessment.
~~to pay~~ Contributions
towards the work, in the terms

2.

of the Disp- order which
was sent to you by the
Dewan demi officially a
few days ago. The
increase rate is levied
from both East & Main
lands - (as was exempted
in the case of Rampur
Channel),

7. ~~If the D.P.W.~~ are
prepared at once to
commence the Extension
I am to request a very
early settlement of the
questions referred to in
the last ~~[redacted]~~ preceding
three paragraphs, and
the submission ~~[redacted]~~ of a
full report of such
settlement, if possible
within the next fortnight

I have
the
honour
to be
Sir
Your most obedient
humble servant

To,
The Chief Secretary to the
Dewan of Mysore

Sir,

With reference to your letter No: 1259, dated 26th September, 1888, on the subject of the proposed Kalhalli Channel extension, I have the honor to submit a memorandum of an interview which Mr. Kane and I, had with the Guru, of Sri Parkala-swamy Matt.

I shall address you again on the subject, as soon as I have definitely heard, in writing, from the Guru. The Sub Division Officer, French Rocks, has been

taking needful steps in re.
Contribution from Ryots, and
a report shall be submitted,
as soon as the formal report
is received from Sub Division
Officer.

I have the honor to be

Office of the French Rocks Range

Dated French Rocks 14/23 may 1888

No. 283.

To

The Executive Engineer

Mysore Division

Sir,

With reference to the Superintending Engineer's no: 5400 of the 11th November 1885, to the Assistant Engineer French Rocks Range, forwarding the inspection Report of Mr. Rigg, Executive Engineer Hemavati Division on the Kalhally Channel Extension - dated 11th may 1874 - for report about the preparation of an estimate for the proposed Extension and subsequent reminders, I have the honor to report - that I inspected the Channel, as well as the trace of the Extension up to the 12th mile stone in September last but having been told by Channé Gowda overseer Chennappiah that a project was got ready by Mr Dalal (while Channé Supt some ten years ago) after the taking of regular surveys and sections, I was anxious to find out what was the nature

of

of the Correspondence and of the field work done during the interval of 13 years, after date of the Inspection Report.

2. I accordingly got a search made both in the Old records of the Range Office as well as in those of the Hassan ~~District~~ Division from which I have lately got together a file of correspondence beginning with Hassan District Deputy Supt's no. ~~379~~ 578 dated 4-3-1870 to the Executive Engineer Hemavathy Division and Ending with docket no. 379 dated 7-7-1880 from Mr Dalal, asst: Engineer Narsipur Range, to the Executive Engineer Hassan Division; as also some Survey plans, Sections and rough Estimates most of them not authenticated.

3. From the Correspondence it appears that the Chief Commissioner ordered on 20-3-1871 that the Conservancy of the Channel was to be taken over by Government but that the Extension was not to be dealth just then, and when carried out Eventually, it was to be wholly at the Cost of Government.

4. In his Inspection Report dated 11-5-1874 — some underference from Mr Rigg, Executive Engineer from —

1881

-mended the project of improving and Extending the Channel being taken up as a very remunerative one, to which the Superintending Engineer replied that the question would be submitted for orders of the Chief Commissioner.

5. In his Inspection Report of 13-3-1876 Mr Riggs again noted the question and submitted certain details of ~~gabs~~ grades and water supply on which the Superintending Engineer called for a grades statement in proper form, and awaited a project, which he said, had been under consideration for many years and appeared advisable. In reply, Mr Riggs in no. 25 dated 8"—6-1876, submitted further details with plans and list of Channel works & grades, which later were sanctioned by the Superintending Engineer in his no. 1804 dated 12-6-1876, with remarks on certain details of masonry works for getting over the cross drainages Mr Riggs Explained — in no. 275 dated 1-8-76, certain of the deviations proposed, and while submitting a rough Estimate for Rs* 8337/- for improving the Channel and Extending it up to the 12" mile, requested permission to start work as a famine relief measure, in

This Estimate makes no provision whatever for improving the 18-6 miles of the Channel (Rd). V.H.K.

reply to which the Supg: Engineer declining to start work without strong recommendation of the Division Commissioner, in the absence of a detailed Estimate, suggested the Extension being taken beyond the 12" mile, to be sufficiently remunerative, as the Cost up to that alone, would be nearer Rs 15,000, than the figures of the Executive Engineer and directed the papers being laid before the Chief Engineer on his approaching Inspection.

6. In the meantime, Survey & Sections had been pushed on up to 13 3/4 mile by Mr Warder, Assistant Engineer and the Revd Statement furnished by the Deputy Commissioner showed an increase of Rs 3284/ i.e. up to 12" miles only. The papers were then laid before Major Christie, Superintending Engineer, during his inspection of the Channel in November 1876, when he directed the Extension being carried down to 16" mile beyond which it would be too costly to continue, on account of rocky and difficult ground.

no ; up to 12 1/2 mile.

7. Prior to his Inspection of the Channel, the Superintending Engineer had made a reference to the Commr

Ashtagram Division for his opinion on the right of the Govt. to Extend this Drain Channel, and on the letter No: 580/83 of 9-12-76 of the latter Officer the Chief Commissioner in his order No. 76 dated 26-12-76 observed that the objection raised by the Guru of Sankalsandra mutt to the proposed Extension was untenable and that the claim put forward by him to a share in the anticipated increase of Revenue, was altogether inadmissible.

8. On a further reference from the Ashtagram Division Council-letter No. 737—100 dated 13-2-1877, the Chief Commissioner, in his order No. 416 d 5-3-1877 observed that the rights of the mutt were limited to the first portion of the Channel or 7½ miles; and Sanctioned the work being put in hand; but desired that its utility as a relief work was to be kept in view. The above Sanction was conveyed to the Executive Engineer, in Lr. Engineer's dockets No. 912 dated 14-3-1877, with instructions to start at once the earth work up to the 12th mile and to submit the Estimate without delay. But the records available do not show, when the work was started or how far it progressed.

progressed as a famine Relief work.

9. In his letter no. 157 dated 6.4-1877 Mr. Rigg Executive Engineer Submitted a revised statement of Channel widths, showing slight alterations to adopt it to the full length of Extension up to the 16th Mile, as recently decided upon; but the statement was returned, in no. 1301 dated 11.4.1871 with remarks about certain difficulties needing further investigation, viz the feasibility or otherwise of increasing the depth of water at Head of Channel from 2½ feet to 3 feet by raising some of the low portions of the ancient, in preference to widening the Channel in the upper miles and allowing greater depths in the lower ones.

10 No further action appears to have been taken in the matter till 24-1-1879, when Mr. Gaskeer, Executive Engineer issued instructions to the Assistant Engineer Hassan, in no 111-13 for the preparation, in the rough of an Estimate for the improvement of the Channel as well as for the scouring up of the ancient levels during the dry season, which last alone, appear to have been furnished by Mr Dalal.

asst. Engineer

assistant Engineer with his docket
no. 379 dated 7-7-1880.

11. And here stops the old Correspondence, without giving a clue as to how far, the preparation of the project progressed, or ~~without~~ what became of the Survey plans of the Extension up to the 16th mile, and of the Longitudinal and Cross Sections of the proposed line beyond the 12th mile. The drawings found are, 2 tracings of the present Channel, with the old trace of Extension and Seven sheets ong Longl: and Cross Sections of the line from the 6th to the 12th miles (not authenticated)

The Survey Plans are found in this Office, but not the Longl. and Cross Sections beyond 12th Mile. Probably they were not taken (Sd/- V. N. K.)

12. I now beg to observe that during my late inspection, I found the Existing Channel generally in fair order, with here and there short lengths of weak or low bund and overgrown sides and banks in others; while the Madavais (Sluices) were all Katcha, i.e consisting of dry Stone tunnels of all sizes, leading to a great wastage of water, in addition to which breaches, wrough, leakage, were of frequent occurence. a Statement showing the Condition of the present Channel bund, grass and Sluices is annexed for information

13. The trace of the Extension, was picked up by me here and there, with the help

of

of the mile and ½ mile stones fixed up to the 12" mile and shewn by the villagers. I may briefly state that, having the Old Channel at the 6" mile, the new trace goes slightly above it and into the Budnapur sunk bed (8¼ – ½ mile) close to bund. Thence it keeps close to the old trace till the Kammumbady anicut — (Danikam fort 8½ miles) after which it goes up a valley into the interior (10¾ mile) which, on return, goes close below Gopalpore village (11½ mile) and running up another extensive valley, stops near Rajjan Kattay bund, at the 12" mile, without crossing it. Beyond this, the proposed line was not shown to me by the villagers, who were not aware of it evidently, and as I myself did not then know that surveys had been taken further on, I stopped there.

9½ mile, passing just about the village of Poovanakalle (10¼ miles) Another valley beyond this takes the Channel much more into the interior

14. I may here be permitted to remark that the Extension of the Channel is looked for by the ryots of the villages round about, as anxiously as ever, and as the lands are above the average in fertility a good remuneration is certain to be derived by, by the villagers as well as by Government, at the same time, that the main ryots

will

of this water Supply, is not very plentiful espece towards the tail End, where the Government lands are situated.

This Estimate is only for 9.1 Rworks (Sd) V.H.K.

15. From the rough Estimates found, the Earthwork alone is likely to Cost near Rs 12,000 for Reimprove-ment and Extension up to the 12" mile as proposed by Mr Rigg Executive Engineer in his State-ment of the 5th April 1877, the total Cost up to the 16" mile, may pro-bably reach Rupees 25,000/-

I have prepared a rough Estimate. (Sd) V.H.K 17.8.88

16. If furnished with the old plans and Sections, or allowed time to get them up afresh, I shall be glad to prepare the project with the Establishment now allowed for the range.

X X X

I have &c

R. Rigg
Chief Secretary

Chi

Memorandum of an interview with Sri Parkalaswamy.

In pursuance of Chief Secretary's letter No: 125, dated 26th September, Mr. Hanne, and I, had an interview with the High Priest of the Parakalaswamy Matt, on the 4th October, 1888, pursuant to appointment, the object of the interview having been previously announced, by a Canarese Communication, and a personal Conversation, with the Matt Agent.

2. The Guru, near which chiefly solicitous

that the rights Con-
-ferred by Canada
should be maintained
in their entirety. It
was explained, that
these would not
in the least be affected
by the proposed ar-
rangements, but that
on the Contrary, by
Government keeping
the management of
the Channels and head
works, there was the
utmost guarantee
of their upkeep, in a
state of efficiency,
superior to what it
could be, under the
management of the
Riparian officials.
3. The next point

discussed was, whether the Mutt will be liable to pay irrigation, or other Cesses on the land now irrigated in the Imam village. Answer was made, that a lump sum Contribution was annually, being agreed upon, for maintenance purposes as suggested at the end of para 4, of the Chief Secretary's letter. Similar Answer was made to an enquiry whether the Mutt will have to defray any portion of the Cost of Conservancy Establishment.

4. The Guru next

stated, that he understood that there was more land nowadays, which could be irrigated by the excavation of a branch channel, within Juan village limits, and desired, that arrangements should be made, for the necessary extensions, the Matt. defraying the Cost. Answer was made that it would be the solicitude of the P.W.D. to make the channel serve the utmost, and that arrangements could be made to irrigate all irrigable area, on the condition -

that the Matt defrayed the cost of the branches, as well as of widening that might be necessary of the Channel higher up, and also the proportionate Cost of Establishment on this account.

5. Question was asked whether the Matt Authorities will be allowed to irrigate more land if found expedient hereafter. Answer was made that though on principle, there would be no objection whatever, and there would be no difficulty in respect of small areas, it is desirable

that all the area deemed to be irrigated, should be specified before hand, so that the project may be prepared and adapted to the requirements.

6. Question was asked about sluices, and whether more would be supplied if found necessary. Answer was made that the arrangements for supply of water, will be the same, as for all Government villages, and determined by a careful calculation, and that there was no need for any misgiving on this head. Allusion being made to the need for prompt

redress of Complaints of insufficiency of water &c, the Guru was informed that all such Complaints would be reduced to a minimum, by iron pipes being fixed for sluices discharging the requisite quantity of water, and requiring no manipulation, and that the cost of such pipes for irrigating Inam village lands, should be borne by the Inamdar, viz the Matt.

7. As to the rate at which a maintenance allowance payable annually by the Inamdar should be fixed, there was some discussion

but the exact amount was not fixed, the Mail Agent, and the Executive Engineer, desiring to examine accounts of previous expenditure, with a view to ascertaining what the average over a long series of years, if this could be ascertained has been.

8. As to land required for widening the Channel, in Inam village limits. The Guru desired, that land in exchange of equal area, in a convenient place, i.e. near the Inam village, should be given, and registered as Inam. The Deputy Commissioner —

answered by saying, that there will probably be no difficulty in giving in exchange and registering as Inam lands equivalent in kind, and area, or value, to occupied lands which may be taken up, by Channel widening. And if Government waste was available near the Inam village, there would be no objection to making the grant out of such waste.

9. It was represented on behalf of the Govt, that there was Government waste land, which would be —

irrigated by the extended
channel, and which
should be given to the
Natt, as it adjoined
the lands which the
Natt now held as
Candiayan land's
from Government. The
Deputy Commissioner
stated, that Govern-
-ment would proba-
-bly not agree to give
away the lands gratis,
and that in view of
neighbourhood the
utmost that the Natt
Could, reasonably
ask for, (though the
question of the rea-
-sonableness of Com-
-pliance is quite a
different one), was, 5
that they may be

allowed to have the
lands at the average
selling prices of other
similar lands. The
Guru was very an
-xious to be allowed
to have these lands
gratis, subject to the
payment of usual as-
-sessment. The point
remained as an
open one, on which
the Guru might
make a representa-
-tion, for consideration
-tion of Government.
10. The Guru wonder-
-ing whether by the
Inam village lands
being in partner-
-ship with the
Government lands,
for the water—

running in the Chan-
-nel, would suffer
by having in Con-
-sequence of such a
partnership, to
share the water, which
may be limited in
exceptional seasons
of drought, whereas
at present, they have
all the water to them-
-selves. Answer was
made that this was
not a matter for
practical Consi-
-deration, as such
a Contingency
would never arise,
and even if it arose,
the Duan lands
being at the begin-
-ning of the Channel

had no need for any
Concern what-
-ever, as there might
be, if they were at the
end of the channel.
11. The Queen mani-
-fested a reluctance
on the ground that
a link which had
been conferred, would
be lost by transfer
of the channel to
Government. He
was assured that
there was no for-
-feiture of any link
whatever, because,
the proposed arrange
-ment while depriving
the Natt of no exist
-ing or ~~prospective~~
advantage, Conferred
on the Natt all the

benefits of manage-
-ment by superior,
and professional
agency; and that
this question was
not an open one, the
matter having been
decided by the ar-
-rangement made
in 1884, by which
the management
of the Channel and
Headworks were
made over to the
Natt, on distinct
& foreseed Conditions.
12. The meeting
then broke up, the
understanding being,
that the Gurroo had
no objection to the
arrangements

proposed in the Chief Secretary's letter, that the Guru desired that lands of value equal to those which may be taken up by the widening of the Channel should be conferred as Inam, that the Guru would solicit a free grant of the Government waste lands near the Mut Candayan lands, and, that while he was willing to agree to the payment of an Annual Contribution, being in return relieved of all charges for maintenance of Head

worthy and Channel and Conservancy Establishment, the exact amount of that Contribution was to be fixed, after some further discussion, with reference to actual expenditure incurred in the forest.

Sir,

With reference to your letter No 1259 dated 26th September 1888, addressed in continuation of my No 551 dated 6th November 88 on the subject of the Kabbalie Channel improvement and relinquishment I have the honor to submit for information copy of the correspondence noted in the margin:—

Copy of

1. Report from Asst Agent No 135 dated 26.11.88.
2. Report from Asst Agent No 128 Dy 15.11.88 about alignment —
3. To Executive Engineer Mysore Division about alignment No 310 Dy 14.11.88
4. from Do. - Do No 972 Dy 15.12.88 of alignment
5. Report to Asst in reply No 783 Dy 19.12.88 about cash of alignment
6. Reply from Asst Agent No 1148 Dy 22.12.88 about cost of alignment
7. Docket to Ex. Engineer No 378 Dy 29.12.88 about alignment.
8. Report to Asst about cost of alignment No 459 Dy 9.1.89.
9. Sub Divisional officers letter No 562 Dy 27.12.88 about Kyoto Contributions

2. The Hon Parakalaswamy Rs at first advised had an exaggerated idea

idea of his rights over the Kalkalli Ancient and there was some difficulty in making him understand the exact position in which the orders of February 1884 left the matter and the magnificence of the distinct reservation made when the change of the Ancient and present channel within the village limits was transferred to Mutt management. The Mutt Sheristedar's communication No 135 dated 26th November last is thus one written in supersession of a previous one written and with drawn.

3. The important question is as to alignment. The Panakal Swamy desired that the channel should be carried along

*: Vide paragraph 4 in Sheristedar's No 135

an old tracing so as to command as much of the Kham lands as possible and he was prepared to pay the difference between the cost of this alignment and that of the alignment which Government might otherwise adopt. This being a very reasonable offer the Executive Engineer was communicated with. In the result the Executive Engineer intimated that the amount which the Khamdan would have to pay (that is the difference as above stated) would amount to 16000/Rs and if rock be met with the amount would be more. The area of Kham lands which would thus be commanded would be 230 acres. Evidently the project is not remunerative

Unless

unless the Inamdar
Ryots besides having
a Wet assessment
on dry lands converted
into Wet agree to tribute
- ute towards the Costs as
the Inkan Ryots lower
down have done.

4. The next question is
to the liability of the
Inamdar to pay irrigation
Cess on lands at present
irrigated, and a water
rate on what are
at present dry lands
and which may hereafter
be converted into Wet
by the Channel water
whether or not in
Consequence of Channel
improvements. As well
as can be judged at
present the area so
irrigable does not
appear to be more
than 30 Acres. The
Inamdar desires
Exemption and I
submit

x. Vide paragraph 4 in
Mutt Shenishedaris
No 135.

x Vide Vide Ex Engrs
Consl note on
his plan.

submit that Government may accede to the Samoans desire.

5. Another question is compensation for land which may be taken up for extension. The Samoan desires to have irrigable land in exchange. This is extravagant. As the land taken up would be chiefly margins of deep taro land, it may be ordered that in the case of occupied and cultivated dry land Compensation shall be paid to the land holders at market value (it being noted that the Survey Settlement with the Survey guarantee has been introduced into these Villages) and that deep land shall be given on the border of the Town Village or in as convenient a situation as possible

* Vide point 5th in Chairman's No 135

in Exchange for all the land that may be taken up, the land to remain being registered in Mauritius.

6. Another question relates to Crown unoccupied land on the borders of the Mauritius village now deep, but liable to be converted into wet under channel Extension. The Mauritius holds under ryotwary tenure some Government wet land in the neighbourhood, and in descending of hauling also the deep land adjoining it which may hereafter be converted into wet. He wants this without being required to pay a Value for the same, and subject only to the wet assessment which may be fixed on the lands. The request seems Extra

* Point 6 in Mutt Sheristedar's No 135.

Extravagant, though if government be disposed to accede to the request the generosity will not be misplaced in the case of a religious and charitable institution like the Trustees. Short of this generous compliance, will be to agree to give to the Commissioners (in the spirit of rule III printed at page 8 of the Remainder Manual) the lands in question at the highest or even the average value which may be realised by the sale of Government unoccupied waste lower down to be thereafter commanded by the improved and extended channel.

7. Another question which must sooner or later arise is the manner of meeting the cost of iron pipe sluices which may hereafter

hereafter be fixed in the channels within Inam Village limits as well as in Government Village limits the Inamdar should bear. The cost as indeed is only just and proper that he should, his receiving himself by contributions from his ryots being an administrative detail for, his own disposal. In the circumstances it may be ordered that the Inamdar shall pay only the price of the main pipes delivered at sites (as distinguished from the masonry and other charges for fixing them)

8. The last and not the least important question relates to the contribution to be annually paid by the Inamdar

|| x point 3 in matter Sheristedar's no 135

x. points 1 & 2 in matter Sheristedar's no 13

Khandesh to Government
the Khandesh being in
return received of all
liability for construction
repair, and maintenance
of Head works and Channel
including cost of Conser-
-vancy establishment.
It will be observed
from the Correspondence
that the justice of pay-
-ing such a contribution
has been admitted by the
Khandesh. The Khandesh
says that the average
annual expenditure
incurred by him in the
past has been Rs 130/-
and says that Rs 100/-
may be fixed for the
future. I am not
aware what the annual
Expenditure has been
in the P. W. D. But my
impression is that the
last Account cannot
furnish a reliable
or satisfactory basis
for determination.

There

There are no necessary accidental or incidental features to be determined or to be taken into Calculation. In my opinion the table of Irrigation rates now allowed by Government for maintenance of Government Channels affords a better criterion. The highest rate is 75 Rs a mile (allowed for Kallā pāsu and Chicka Deva rāj Sagar Channels drawn from the Cauvery River and North Channel Irrigation Dewan drawn from the Hema. Vatī river). The lowest is Rs 20/- a mile (as for the Hirsoorkeri Channel drawn from the Lakshman Thirtha) As the provision to be made is to cover cost of Superintendence Establishment and Charges for Head works also and is a sort of insurance fee for Main

yet, the settlement recommended by the Sub Division Officer and accepted by the ryots, may, I venture to submit be approved and accepted by Government also.

If the instalments seem too many, but this small may be overlooked in the circumstances of the case, and declared to be such as should not afford a precedent or example for other Cases.

Executive Engineers Office
Mysore division

No 972. 4

Dated Mysore 13th December 88

From

The Executive Engineer
Mysore division.

To

The deputy Commissioner
Mysore District

Sir,

I have the honor to acknowledge the receipt of your no 310 dated 14th November last, forwarding copy of representation from the Parakala. Lakeing Mutt, Owner of the Kallahally channel Extension, with a request that the Channel may be so aligned that it may irrigate the largest possible area.

2. In reply I have the honor to state that it is possible to take the Channel as desired by the Mutt along the old and almost obliterated trace of it, running above the present channel, and lying between the 6th and 7th

miles of the Calli, but that the Assistant Engineer who has taken the necessary Surveys and levels roughly Estimates the Cost of the work at Rupees 16 each/cover and adds the Estimated Cost of improving the present Channel from the 4th to the 8th mile, while the additional area that would be thus brought under irrigation is only about 230 acres. The actual cost might so far to seven Rupees 2000 if rock is met with, which is not unlikely considering the Nature of the ground and the depth of Excavation needed. I am therefore of opinion that it is not advisable to follow the old trace, but if the Govt wishes to adhere to it, I shall refer the matter to the Superintending Engineer for his orders, on hearing from you.

5. It is not known why the

the piece under reference was given up when originally planning out the channel, but it is very likely that it was on the score of cost.

4. Favour of very early reply is solicited, as arrangements are now quite complete to start work.

I have the honor to be,
Sir,
Your most obedient Servant.

Enclosure No.

Sir

With reference to
your letter No 972 dy
13th instant in regard
the realignment of the
Kakalay channel
along the old trace
as desired by the Agent
of the Karakalaswamy
mill at an Estimated
cost of Rs 16000 or 20000
if rock be met with
course of the Excavation
I have the honor to
for

forward herewith a Copy of the representation made by the Agent of the above Mutt on the 22nd instant.

2. In a personal interview I am sure you will be fully aware that the above Estimate is the difference between the cost of the alignment desired by the Mutt if practicable, and the cost which Government will incur in furtherance of their own project. I am sure also you will be aware that the alignment desired by the Mutt costs much more than what the Mutt Expected by a calculation of averages the consequence of the Exceptionally heavy cutting along the same in these circumstances and as the figures do not make the Mutt project remunerative to the Mutt the Sirpur Kaghaznagar will

will not feel disposed to countenance it. The idea may therefore be abandoned and the Government project proceeded with.

I have &c.

No 562.

French Rocks Sub. division office
27th December 1838

To

The Deputy Commissioner
Mysore District.

Sir,

Your docket no 352 dated 2nd October last calling for a full report about contributions from Ryots for Kalkhalli Channel Extension, and also your docket no 426 of 13th November and Memo no 470 of 10th December

In reply, I have the honor to submit that on the 30th October last, I had been to the Village that are to be benefitted by the Extension of the Channel in question and in company with the Amildar of Nellikuppa I inspected the lands in the presence of the Ryots and also considered

Considered the surrounding circumstances of the Country.

5. The Channel when Extended will run a distance of about 5 miles through the Villages of Punnakally, Hosacotta, Mannakere, Kopalpura and Hosare, the last two of which are destitute of Kopulakain (Beeheak) the area of dry land to be brought under wet cultivation in consequence of the Extension of the said Channel is roughly Estimated at 1482 Acres and 33 Gundas as shewn from the Statement herewith Submitted

6. According to the Records in the Sub Registrars office at Attikuppa the average Value of wet lands at Kallally is 219 Rupees per Acre and at Hosacotta 245 Rs per Acre. The lands so Valued above are only in two selected places and there is nothing on the Records of the Sub Registrars office

office to show the price of lands in other localities. The value of dry lands varies from 3 to 21 Rs 5. I do not think I am justified in applying the above mentioned Market Value to the lands to be brought under Wet cultivation after the Extension of the Channel. The Market Value of these lands is to be fixed after considering the local and other circumstances of the place. Of the 5 Villages mentioned in Para 3, only Pannamkally, Mannankone and Koracattai have some population and the inhabitants of these villages have to cultivate their own lands as well as those of Gobalpuram and Kosuve. Consequently the Value of lands in the two last mentioned Villages is somewhat

somewhat low when compared with that of other Villages, even the three inhabited villages are under poor circumstances. The soils are of a mixed description. The high lying lands are poor and gravelly whereas the soil in the hollows is peaty and sandy. The junction of the Kaimeny and the Kumarate lakes flows towards the West of these villages and the Dipane Kalla and the lands irrigated by it lie further West, so that there is a great hindrance for easy communication on this side. The River Kaimeny on the southern side obstructs the facility for traffic. There are neither roads nor Markets on the Northern side of the Villages to enable the Ryots to have already sale of the produce of their lands. The only way open to them is to carry their produce through

through the Kannambady road to French Rocks, Sirnipapa. Lem and Mysore. As there is no road leading from these villages to Kannambady, it is very difficult for the Ryots to cart away their Grain to public markets. So it is clear that there is no facility of communication between these Villages and the public Markets.

6. From the statements of the resources of the Villages here with submitted, it may be seen that the 3 inhabited Villages Contain only 539 able-bodied men and 629 bullocks, 12 carts and 259 ploughs. But the quantity of land to be converted into wet being 1482 acres, I think it cannot be well managed by the Ryots with the number of bullocks and ploughs stated above. As the quantity of wet now under cultivation

in

in those villages is very small when compared with their population, it will undoubtedly fetch a good price varying from Rs 100/- to 250/- per acre of rice land; but the Extension of the channel will increase the quantity of wet land to such an extent as would create a great demand for the Ryots to cultivate the same and the result will be a great deduction in the price of wet lands. I made local inquiries as regards the would-be value of the dry lands and when converted into wet, and found that it may vary from Rs 75 to 125 per acre, and the present price of dry varies from 15 to 21 Rs per acre.

7. I explained to the Ryots the imminent benefits to be derived by them from the Extension

9. According to the above rate, the amount of contribution that may be levied from the Ryots will come to about 26,880 Rs. as the area of land under occupation is 1344.9 acs as there about 138.4 Government Waste and kharab, they may fetch when sold Rs 5,800/- Thus the contribution amount and the sale proceeds will make a total of Rs 32,680

10. The Muchalika executed the ryots is herewith submitte

I have the honor to be,
Sir,

The subject of the Correspondence above read has been under Consideration a long time and the Dewan has had the advantage of discussing the details of the with the Guru of the Sri Parakala Swami Mutt. The express terms under which the present Channel & Connected works were restored to the management

of the Mutt ... ... 1884 after having
been under ... of the D.P.W. since
1871-72, ... for discussion as to
the right of ... in his office ... the management
and the ... acceded to the
Govt taking ... the entire channel
and Causeway ... maintaining the
same here ... suite paying a fixed
annual ... on account of
maintenance ... the Govt relieving
the Mutt ... liability to contribute towards
any special ... channel or Headworks
which might be required hereafter ... gradual
deterioration ... whatsoever.
advantage ... gement is one of obvious
and it ... its tenants,
and it ... Govt to carry out an
important ... which has long been
under Consideration.

2. Having ... the prevailing rates
of maintenance ... Govt Channels, the
Mileage ... recommended by
the Dept Comm ... idered as fair
and reasonable ... having regard to
the relig ... the character of the

~~institution~~ institution, the Govt have been pleased to fix the very low rate of ~~Rs~~ Rs 30 per mile per annum, and for the 7½ miles of channel irrigating ~~Rs~~ the Inam lands of the Mutt, the Annual ~~R~~ charge payable by the Mutt is Rs 225. This amount shall be regularly paid on or before the 31 March of each year, the first payment being made on or before 31 March 1890.

All repairs and other works hereafter required to the channel & head ~~works~~ and other works (the possession of which shall at once be resumed by the Govt) shall be executed at the Cost of the Govt. which shall of course bear the Cost of any maintenance & other establishments required.

3. The occupants of Mutt Inam lands under the channel shall of course enjoy as regards distribution of water all benefits which are enjoyed by occupants of Govt lands. In regard to Iron Pipe sluices, the charges shall be assessed to Inam & Govt Ryots under the same Rules.

4. The Mutt desires an alteration of the present alignment of the extension Channel so as to command about 230 Acres of Inam land. The extra cost of such alteration the Mutt

is willing to pay [illegible] amount of it — namely
Rs 16,000 & [illegible] deal more than if
[illegible]
as is probable [illegible] met with — is prohibitive.
and the proposal [illegible] regarding been
abandoned [illegible] is advantageous to
the Mutt.

5. In lieu of [illegible] Inam land which has
to be taken [illegible] widening of the Channel,

Proceedings of the Government of His Highness the Maharaja of Mysore, (Revenue),—dated 16th December 1889,

READ THE FOLLOWING PAPERS:—

From the Secretary to the Government of Mysore, Public Works Department, To the Executive Engineer, Hassan Division, No. [illegible]9, dated Bangalore, 22nd February 1884.

Executive Engineer's No. 9, dated 11th January 1884, submitting an estimate amounting to Rs. 2,860 for the repairs of the Kalhalli anikat, &c.

Has the honor to return the above estimate and to inform that the Local Governn ent has decided as follows—

That there is no necessity for Government to undertake the direct execution of the repairs of the Kalhalli Anikat and Channel provided that,

(1) the inamdar executes all the annual and special repairs required in accordance with the estimates and specifications prepared by the Public Works Department and to the satisfaction of the Executive Engineer of the District,

(2) that in the event of Government wishing to extend the channel at any time hereafter, no obstruction be offered by the inamdar to the Public Works Department officers, taking up the additional land that may be required for the widening and improvement of the channel.

2. The inamdar to be informed that the channel and anikat are handed over to him on the above conditions. The accompanying estimate with the necessary specification should be furnished him and the Executive Engineer should see that all repairs are executed in accordance therewith in a thoroughly substantial manner.

3. As regards the Channel Establishment, Executive Engineer should submit his proposals as to what he intends to do with them, as their services will be no longer required by Government.

4. The annual repair estimate should be prepared and handed over to the inamdar in the same manner as the special repair estimate herewith returned.

5. As regards the outstanding arrears of contribution not recovered from the inamdar, Executive Engineer is requested to submit a statement showing the whole expenditure incurred by the Public Works Department on this channel for all repairs from 1871—72 to date and the actual contributions recovered in cash and labor from the inamdar during the same period.

Extract from letter No 283, dated 14th May 1888, from the Assistant Engineer, French Rocks Range, To the Executive Engineer, Mysore Division.

14. I may here be permitted to remark that the extension of the channel is looked for by the raiyats of the villages round about, as anxiously as ever, and as the lands are above the average in fertility, a good remuneration is certain to be derived by the villagers as well as by Government, at the same time, that the inam raiyats will be sure of their water supply, which is now not very plentiful especially towards the tail end, where the Government lands are situated.

From the Executive Engineer, Mysore Division, To the Superintending Engineer of Mysore, No. 368, dated Mysore, 17th August 1888.

3. The present length of the channel is 8¼ miles, of which the first 7½ miles are within the Inam of Kalhalli, and the rest belongs to Government. The area irrigated at present is 421 acres, of which only 25 acres is Government. By extend-

ing the channel as proposed, 1,185 acres of additional lands will be brought under irrigation, and from which a revenue of Rs. 5,925 calculated at Rs. 5 per acre can safely be estimated. The revenue statement in the file of correspondence shows that the Revenue Department expects a revenue of Rs. 3,282 from 618 acres under the extension up to 12½ miles only. Further extensions had not been under contemplation when that statement was prepared. I may observe here that the Revenue Department has assumed for its calculation, a rate of Rs. 6 per acre, minus the present dry crop rate which is less than one rupee. By applying that rate to the whole of the area under the extension up to the 16th mile, a revenue of Rs. 6,280 is obtained, but to err on the side of safety I have calculated the anticipated revenue at Rs. 5 only per acre.

4. The expenditure necessary to secure the above revenue of Rs. 5,925 is roughly estimated at Rs. 40,000, so that Government will recoup itself in less than 7 years. Thus the project is highly remunerative even if it should cost Rs. 50,000. The raiyats are also, as will be seen from Mr. Tivari's report and previous correspondence, very anxious about the extension of the channel.

Note by the Secretary, Public Works Department, dated 20th September 1888.

I beg to submit for your consideration a rough estimate of Rs. 40,000 for extending the Kalhalli channel from the left bank of the Hemavati river.

A contemplated extension of this channel has been on the "Tapis" for many years, but although sections and surveys were taken and even estimates prepared, a project was never definitely sanctioned.

On my calling on him to put the project for this work into tangible shape, Mr. Karve has submitted a rough estimate based on the information already available. This information is not absolutely reliable, but it is sufficiently so for me to say that when the project is worked out in all detail, it will not exceed the rough estimate of Rs. 40,000 by more than 10 per cent, most probably judging from Mr. Karve's rates and lump sum allowance not by even 5 per cent.

I therefore ask for sanction to this, to allow of work being taken in hand, on the condition that a detailed estimate will follow within 3 months.

The project is undoubtedly a remunerative one. The present Inam channel which is 8 miles long, irrigates 421 acres, of which 25 acres only are Sarkar. It is now proposed to extend it to 16 miles so as to irrigate 1,185 acres more. If assessed at Rs. 5 per acre, this will yield Rs. 5,925 per annum, and there is no reason why the same terms should not be exacted from applicants for water as in the case of the Rampur Channel, so that a large portion of the first cost may be at once recouped.

It may be asked why send up a rough estimate? why not wait till the full and complete estimate is ready? I think that by starting the work in the approaching season, we are likely to get in the detailed project sooner than we otherwise would, as the Officer engaged in setting out the work and letting it out to contractors, can prepare the final estimate with great accuracy as he goes along. Besides, time will be saved.

I would not recommend this course however, unless I were pretty confident that the estimate is very near the mark.

There is some difference of opinion between myself and the Executive Engineer as regards the depth to be given to the channel, but whichever way this point is settled, it will affect the cost but very slightly.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Revenue),—dated 16th December 1889.

The work to be done consists of the construction of a new and proper head sluice, of grading the existing Inam channel and of excavating the extension for 8 miles, providing at same time proper subsidiary works such as aqueducts, foot bridges, distribution sluices, &c.

I take it for granted that the Inamdar will not be allowed to oppose this extension and that his rights will be restricted to full irrigation of the lands which he has hitherto irrigated. Command of the channel will have of course to be taken out of his hands.

Dewan's Note, dated 26th September 1888.

I approve of this estimate in the rough for Rs. 40,000 for the extension of the Kalhalli Channel, on the condition that the regular estimate be submitted within the next 3 months.

But before actual commencement of work, two points have to be cleared up and definitely settled, namely—

1st. The contribution to be levied per acre of dry land (Government or Inam) converted into wet and the execution of mutchalikas for such contribution by the raiyats concerned.

2ndly. Some definite understanding with the Parakalaswami Matt regarding the widening of the present channel within the Inam villages and the proper maintenance of this channel in future.

On these two subjects I am writing to the Deputy Commissioner today, and I hope he will be able to effect a satisfactory settlement within the next two weeks or so. It would complicate matters if *before* such settlement we set about the actual execution of the work.

From the Chief Secretary to the Dewan of Mysore, To the Deputy Commissioner, Mysore District, Camp No. 1259, dated Mysore, 26th September 1888.

I am requested to forward herewith for your information copies of the marginally noted papers regarding the proposed extension of the Kalhalli channel from the left bank of the Hemavati river.

1. Note by Public Works Department Secretary, dated 20th September 1888.
2. Dewan's Order thereon, dated 26th September 1888.
3. Public Works Department Secretary's letter No. 719, dated 22nd February 1884, to Executive Engineer, Hassan.
4. Para 3 of Mysore Executive Engineer's letter No. 868, dated 17th August 1888.
5. Paras 7, 8, 13 and 14 of Assistant Engineer, Mr. Tivari's letter No. 283, dated 14th May 1888.

2. You will see from these papers that the channel in question was formerly under the management of Government, that the objection of the Parakalaswami Matt to an extension of the channel by Government was finally overruled by the late Chief Commissioner and that after the Rendition the Government acceded to the request of the Matt and transferred to it the management of the channel, but under certain express conditions as to the maintenance, and as to what the Matt should do in case the Government decide upon an extension of the channel.

3. Upon the repeated entreaties of the raiyats concerned, the Government have now decided to extend the channel up to the 16th mile, and owing to this decision it is now necessary to revise the arrangements recorded in Public Works Department Secretary's letter to the Executive Engineer, Hassan, No. 719, dated 22nd February 1884.

4. Under such circumstances I am to request you will interview the Guru and explain to him the present aspect of the case. The Government have been quite willing to allow the Matt to manage the first 7½ miles of the channel, which is exclusively used for the Inam villages of the Matt, so long as no interests outside

those villages were involved, but even in the case of this portion of the channel they have had to insist upon a proper standard of efficient maintenance, for the protection of the Inam tenants and occupants. But the proposed extension quite alters this condition of things, for where the channel now commands only about 400 acres nearly all Matt Inam, its extension would command nearly 1,200 acres of Government land in addition. This altered state of things justifies a reversion to the former system of the Government keeping the maintenance of the entire channel in its own hands, receiving from the Matt a fixed amount towards this object and relieving it altogether of all liability for paying for special repairs to the channel or head works. The Government hope that this arrangement will commend itself to the Matt, as it is one of obvious advantage to it as well as to its tenants. You are accordingly requested to ascertain from the Matt what amount it is prepared to pay towards annual maintenance, at a fixed rate either per mile of channel in Inam land or per rupee of assessment of Inam wet land under the channel.

5. I am also to request you to require the Matt to issue immediate orders to its agents to give such land as may be required for the widening of that portion of the channel which is situated within the Matt Inam villages.

6. Your early attention is requested also to the necessity of at once obtaining mutchalikas from raiyats whose lands would be converted from dry into wet by the proposed extension, promising to pay an acreage contribution towards the work, in the terms of the Draft order which was sent to you by the Dewan demi-officially a few days ago. The acreage rate is leviable from both Government and Inam lands (as was arranged in the case of the Rampur Channel) and as the raiyats have long been clamouring for this work, it is probable that they will readily agree to pay a fair acreage contribution.

7. The Public Works Department are prepared at once to commence the extension and I am therefore to request a very early settlement of the questions referred to in the last preceding three paragraphs, and the submission of a full report of such settlement, if possible, within the next fortnight.

From the Deputy Commissioner, Mysore District, To the Chief Secretary to the Dewan of Mysore, No. 637, dated Camp Sargur, 10th January 1889.

Adverting to your letter No. 1259, dated 26th September 1888, and in continuation of my No. Gl. 6076—551, dated 13th November 1888, on the subject of the Kalhalli Channel improvement and extension, I have the honor to submit for information copy of the correspondence noted in the margin.

1. Yadast from Matt Agent No. 135, dated 26—11—88.
2. Yadast from Matt Agent No. 128, dated 13—11—88, about alignment.
3. To Executive Engineer, Mysore Division, about alignment, No. 810, dated 14th November 1888.
4. From Executive Engineer, Mysore Division, No. 972, dated 13th December 1888, about cost of alignment.
5. Yadast to Matt in reply to No. 783, dated 19th December 1888, about cost of alignment.
6. Reply from Matt Agent No. 148, dated 22nd December 1888, about cost of alignment.
7. Docket to Executive Engineer No. 378, dated 29th December 1888, about alignment.
8. Yadast to Matt about cost of alignment No. 459, dated 9th January 1889.
9. Sub-Division Officer's letter No. 562, dated 27th December 1888, about raiyats' contributions.

2. The Sri Parakalaswami as at first advised had an exaggerated idea of his rights over the Kalhalli Anikat and there was some difficulty in making him understand the exact position in which the orders of February 1884 left the matter and the significance of the distinct reservation made when the charge of the anikat and present channel within Inam village limits was transferred to the Matt management. The Matt Sheristadar's communication No. 135, dated 26th November last, is thus one written in supersession of a previous one written and withdrawn.

3. One important question is as to alignment. The Sri Parakalaswami desired* that the channel should be carried along an old tracing so as to command as much of the Inam lands as possible and he was prepared to pay the difference between the cost of this alignment and that of the alignment which Government might otherwise adopt. This being a very reasonable offer, the Executive Engineer was communicated with. In the result the Executive Engineer intimated that the amount which the Inamdar would have to pay (that is the difference as above stated) would amount to 16,000 rupees and if rock be met with the amount would be more. The area of Inam lands which would thus be commanded would be 280 acres. Evidently the project is not remunerative unless the Inamdar's raiyats, besides paying a wet assessment on dry lands converted into wet, agree to subscribe towards the cost as the Sarkar raiyats lower down have done.

*Vide point 4 in Sheristadar's No. 135.

4. The next question is as to the liability of the Inamdar to pay irrigation cess on lands at present irrigated, and a water-rate on what are at present dry lands and which may hereafter be converted into wet by the channel water whether or not in consequence of channel improvements*. As well as can be judged at present the area so irrigable does not appear to be more than 30† acres. The Inamdar desires exemption and I submit that Government may accede to the Inamdar's desire.

*Vide point 4 in Matt Sheristadar's No. 135.

†Note *Vide* Executive Engineer's pencil note on his plan.

5. Another question is compensation for land which may be taken up for *extension. The Inamdar desires to have irrigable land in exchange. This is extravagant. As the land taken up would be chiefly margins of dry crop land, it may be ordered that in the case of occupied and cultivated dry land compensation shall be paid to the land holders at market value (it being noted that the survey settlement with the survey guarantee has been introduced into these villages), and that dry land shall be given on the border of the Inam village or in as convenient a situation as possible in exchange for all the land that may be taken up, the land so given being registered as Inam.

*Vide point 5 in Sheristadar's No. 135.

6. Another question relates to Sarkar unoccupied land on the borders of the Inam village now dry but liable to be converted into wet under channel *extension. The Inamdar holds under raiyatvari tenure some Government wet land in the neighbourhood, and is desirous of having also the dry land adjoining it which may hereafter be converted into wet. He wants this without being required to pay a value for the same and subject only to the wet assessment which may be fixed on the land. The request seems extravagant, though if Government be disposed to accede to the request the generosity will not be misplaced in the case of religious and charitable institution like the Matt. Short of this generous compliance will be to agree to give to the Inamdar (in the spirit of Rule III printed at page 8 of the Revenue Manual) the lands in question at the highest or even the average value which may be realized by the sale of Government unoccupied waste lower down to be hereafter commanded by the improved and extended channel.

*Point 6 in Matt Sheristadar's No. 135.

7. Another question which must sooner or later arise is the manner of meeting the cost of iron pipe sluices which may hereafter be fixed in the channel within Inam village limits as well as in Government village *limits. The Inamdar should bear the cost as indeed is only just and proper that he should, his recouping himself by contributions from his raiyats being an administrative detail for his own disposal. In the circumstances it may be ordered that the Inamdar shall pay only the price of the iron pipes delivered at sites (as distinguished from masonry or other charges for fixing them).

*Point 3 in Matt Sheristadar's No. 135.

Points 1 and 2 in Matt Sheristadar's No. 135.

8. The last and not the least important question relates to the contribution to be annually paid by the Inamdar to Government, the Inamdar being in return relieved of all liability for construction, repair and maintenance of head works and channel including cost of conservancy establishment. It will be observed from the correspondence that the justice of paying such a contribution has been admitted by the Inamdar. The Inamdar says that the average annual expenditure incurred by him in the past has been Rs. 130 and says that Rs. 100 may be fixed for the future. I am not aware what the annual expenditure has been in the Public Works Department. But my impression is that the past account cannot furnish a reliable or satisfactory basis for determination. There are so many accidental or incidental features to be eliminated or to be taken into calculation. In my opinion the table of various rates now allowed by Government for maintenance of Government channels affords a better criterion. The highest rate is Rs. 75 a mile (allowed for Kattepur and Chikdevarayasagar Channels drawn from the Cauvery river and north channel Sriramdevar Dam drawn from the Hemavati river). The lowest is Rs. 20 a mile (as for the Husenpur Channel drawn from the Lakshmantirtha). As the provision to be made is to cover cost of conservancy establishment and charges for head works also and is a sort of insurance fee for their safety or maintenance a rate of Rs. (50) fifty a mile does not seem more than what may be fixed for the Inamdar's portion of Kalhalli Channel. The length of this being at present 7¼ miles, the aggregate amount payable per annum will be Rs. (375) three hundred and seventy-five. The Inamdar's raiyats will be liable like Sarkar raiyats to clear weeds in the channel.

9. As to apprehensions of inamdar on minor matters, a general assurance that the interests of the Inamdar's raiyats will be as jealously guarded as those of Government raiyats should be sufficient if at all necessary.

10. Next as to contributions from Government raiyats whose dry lands will be hereafter converted into wet by channel improvement and extension, the French Rocks Sub-Division officer's letter No. 562, dated 27th December 1888, deals with this matter so fully that I may leave to speak for itself. Although I am not able to follow the argument in some respects and should myself have preferred a higher maximum rate with liberty to vary the rate with reference to each individual case securing in the result and as an average the rate of Rs. 20 which the Sub-Division officer has suggested and the raiyats have agreed to pay uniformly yet, the settlement recommended by the Sub-Division officer and accepted by the raiyats, may, I venture to submit, be approved and accepted by Government also.

11. The instalments seem too many, but this matter may be overlooked in the circumstances of the case and declared to be such as should not afford a precedent or example for other cases.

From the Sub-Division Officer, French Rocks, To the Deputy Commissioner, Mysore District. No. 562. dated 27th December 1888.

Your Docket No. 352, dated 2nd October last, calling for a full report about contributions from raiyats for Kalhalli Channel extension and also your Docket No. 426 of 13th November and Memo No. 470 of 10th December 1888.

2. In reply, I have the honor to submit that, on the 30th October last, I had been to the villages that are to be benefitted by the extension of the channel in question and in company with the Amildar of Attikuppa inspected the lands in the presence of the raiyats and also considered the surrounding circumstances of the country.

3. The channel when extended will run a distance of about 8 miles through the villages of Puvanhalli, Hoskote, Madinkere, Gopalpura and Hosur, the last two of which are destitute of population (bechirak). The area of dry land to be brought under wet cultivation in consequence of the extension of the said channel is roughly estimated at 1,482 acres and 33 guntas as shown from the statement herewith submitted.

Statement showing the population and cattle in the villages which will be converted into wet cultivation under the Kalhalli Channel extension, 1888—89.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Revenue),—dated 16th December 1889.

From the Executive Engineer, Mysore Division, To the Deputy Commissioner, Mysore District, No. 972, dated Mysore, 13th December 1888.

I have the honor to acknowledge the receipt of your No. 310 of 14th November last, forwarding copy of representation from the Parkalaswami Matt anent the the course of the Kalhalli Channel extension, with a request that the channel may be so aligned that it may irrigate the largest possible area.

2. In reply, I have the honor to state that it is possible to take the channel as desired by the Matt along the old and almost obliterated trace of it, running above the present channel and lying between the 4th and 8th miles of the latter, but that the Assistant Engineer who has taken the necessary surveys and levels roughly otismates tho cost of the work at Rs. 16,000 over and above the sanctioned cost of improving the present channel from the 4th to the 8th mile, while the additional area that would be thus brought under irrigation is only about 230 acres. The actual cost might go up to even Rs. 20,000 if rock is met with, which is not unlikely considering the nature of the ground and the depth of the excavation needed. I am therefore of opinion that it is not advisable to follow the old trace, but if the Matt wishes to adhere to it, I shall refer the matter to the Superintending Engineer for his orders on hearing from you.

3. It is not known why the trace under reference was given up when originally opening out the channel, but it is very likely that it was on the score of cost.

4. Favor of very early reply is solicited, as arrangements are now quite complete to start work.

From the Deputy Commissioner, Mysore District, To the Executive Engineer, Mysore Division, No. 378, dated 29th December 1888.

With reference to your letter No. 972, dated 13th instant, as regards the alignment of the Kalhalli Channel along the old trace as desired by the Agent of Sri Parakalaswami Matt at an estimated cost of Rs. 16,000 or 20,000 if rock be met with in course of the excavation, I have the honor to forward herewith a copy of the representation made by the Agent of the above Matt on the 22nd instant.

2. On a personal enquiry you were good enough to inform me that the above estimate is the difference between the cost of alignment desired by the Matt if practicable and the cost which Government will incur in pursuance of its own project. You were also good enough to add that alignment desired by the Matt costs much more than what the Matt expect by a calculation of averages in consequence of the exceptionally heavy cutting along the same. In these circumstances and as the figures do not make the Matt project remunerative to the Matt, the Sri Parakalaswami will not feel disposed to countenance it. The idea may therefore be abandoned and the Government project proceeded with.

From the Deputy Commissioner, Mysore District, To the Executive Engineer, Mysore Division, dated 14th December 1888.

I have the honor to forward for your information copy of representation from the Parakalaswami Matt anent course of Kalhalli Channel extension proposed.

2. I request that you will be kind enough to instruct the Assistant Engineer that the alignment of the channel should be such that the largest possible area that can be irrigated by the water drawn from the anikat as it is, or as it is proposed to raise it to a safe point, may be commanded by the channel. The details as to the proportion in which the cost should be defrayed and alternative lines will be matters for discussion on the "Report" which will be framed by you on the subject.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Revenue),—dated 16th December 1889.

No. 7451-4—120, DATED 16TH DECEMBER 1889.

ORDER THEREON.—The subject of the correspondence above read has been under consideration for a long time, and the Dewan has had the advantage of discussing the details of it with the Guru of the Sri Parakalaswami Matt. The express terms under which the present channel and connected works were restored to the management of the Matt by the orders of 22nd February 1834, after having been under the direct control of the Public Works Department since 1871—72, leave no room for discussion as to the right of the Government to resume the management, and the Guru, in his discussion with the Dewan, acceded to the Government taking possession of the entire channel and connected works and maintaining the same hereafter, the Matt paying a fixed annual amount to the Government on account of maintenance charges, and the Government relieving the Matt of all liability to contribute towards any special repairs to the channel or head works which might be required hereafter owing to sudden accident, gradual deterioration or any other cause whatsoever. This arrangement is one of obvious advantage to the Matt and its tenants, and it enables the Government to carry out an important extension which has long been under consideration.

2. Having regard to the prevailing rates of maintenance on Government channels, the mileage rate of Rs. 50 recommended by the Deputy Commissioner must be considered as fair and reasonable, but having regard to the religious and charitable character of the institution, the Government have been pleased to fix the very low rate of Rs. 30 per mile per annum, and for the 7½ miles of channel irrigating the Inam lands of the Matt, the annual charge payable by the Matt is Rs. 225. This amount shall be regularly paid on or before the 31st March of each year, the first payment being made on or before 31st March 1890. All repairs and other works hereafter required to the channel and head and other works (the possession of which shall at once be resumed by the Government) shall be executed at the cost of the Government which shall also bear the cost of any maintenance and other establishments required.

3. The occupants of Matt Inam lands under the channel shall of course enjoy, as regards distribution of water, all the benefits which are enjoyed by occupants of Government land. In regard to iron pipe sluices, the charges shall be assessed to Inam and Government raiyats under the same rules.

4. The Matt desires an alteration of the present alignment of the extension channel, so as to command about 230 acres of Inam land. The extra cost of such an alteration the Matt is willing to pay, but the amount of it — namely Rs. 10,000 and a great deal more if, as is probable, rock be met with—is prohibitive, and the proposal has accordingly been abandoned as being disadvantageous to the Matt.

5. In lieu of Inam dry land which has to be taken up for the widening of the channel, other dry land of equal extent will be given to the Matt in Inam, in any suitable position contiguous to the present boundary of the Inam villages, and occupants of Inam land taken up for the channel will, in addition, be paid any compensation to which they may be entitled. This is on the distinct understanding that the property in the lands occupied by the channel and connected works, shall vest absolutely in the Government.

6. The Matt asks for the occupancy of Government dry waste land above the Sarkar wet land in its occupation called Buddanapurgadde, promising to pay therefor an acreage contribution. The acreage contribution fixed is Rs. 20, whereas the land, if sold, may fetch about Rs. 100 per acre. The extent asked for is neither stated nor immediately ascertainable, but as the Government wish to deal with the Matt liberally, the occupancy of an extent not exceeding 50 acres of the dry waste land in question will be registered in the name of the Matt which shall pay the acreage contribution on land thus granted, the remainder of the available waste land being alone retained for sale by Government.

7. As the Matt will pay the annual maintenance charge of Rs. 225, it will be exempted from Irrigation cess in respect of its Inam lands under the present channel.

8. The Matt are anxious to have a branch channel taken off at the 4th mile so as to irrigate some new Inam land. This proposal will be considered, and if found feasible, will be carried out, the Matt paying the cost of the required widening of the main channel and of excavating the branch and other works connected with this proposed branch irrigation.

9. The acreage contribution of Rs. 20 promised by the raiyats under the extension is quite liberal enough, and it may be paid as agreed to by them, ½ in the 2nd year, ¼th in the 3rd year and ¼th in the 4th year.

10. The Public Works Department will be requested to proceed with the work in due course, and copies of these orders will be communicated to the Public Works Department Secretary, Superintendent of Revenue Survey and Deputy Commissioner of Mysore, for needful early action.

11. Copy of a Srimukham from Sri Parakalaswami, dated the 16th instant, accepting the arrangements embodied in paras 1 to 9 above, will be forwarded to the Deputy Commissioner of Mysore, for record in his office.

N. KRISHNA RAO,
Offg. Under-Secretary.

To—The Secretary, Public Works Department.
The Superintendent, Revenue Survey.
The Deputy Commissioner, Mysore District.
Copy to Sri Parakalaswami Matt, Mysore.
